## About Tracmaster

**Established in 1984, Tracmaster specialises in the manufacture and supply of the BCS and CAMON ranges of landscape, groundcare and conservation machinery.**

We are committed to maintaining top quality products and service to our customers. Our expertise is second-to-none and our continuous investment in research and development ensures that our products are constantly at the cutting edge.

We are very proud that our CAMON equipment is the first choice for so many customers; professional landscapers, contractors, conservation groups, local authorities, hire outlets, and domestic users across the UK

and Ireland all choose CAMON over and above alternative products. Our rotavators are the market leaders and the best-selling in the UK.

The quality of the CAMON range speaks for itself. Machines that are built to last and produce outstanding results, and at competitive prices.

The range includes ground cultivation equipment, chippers and shredders, lawncare equipment, brushcutters, lawnmowers, hedgetrimmers, and hole borers.

Since 1984, Tracmaster has also been the sole UK distributor for the BCS ranges of Two Wheel Tractors, Power Scythes and Professional Mowers, ensuring that these machines have also become market leaders with a reputation as the best in their field.

# Rotavators

CAMON Rotavators now feature the new PowerSafe® Clutch. This patented hydraulic system provides instant control over the machine and implement ensuring maximum safety at all times, needs no maintenance or adjustment, and is supported by a 5-year warranty.

## C8 Rotavator

The CAMON C8 Rotavator is our best-selling rotavator and has over the years become the first choice for hire companies and landscapers throughout the UK. Key to its success is the combination of the powerful Honda GX270 engine with its compact size.

Ideal for hire companies, allotment owners, gardeners and landscapers, the C8 will provide a great finish even in previously uncultivated ground.

## C10 Rotavator

The CAMON C10 Rotavator features a locking differential and large wheels providing easier manoeuvring and also giving you increased traction when you need it.

If you are looking for a compact rotavator with a large working width and plenty of power then the C10 is the ideal choice.

## C13 Rotavator

The C13 is our most popular large rotavator. As well as a locking differential it also has the added benefit of steering brakes, making it simple to manoeuvre.

It features a large 66cm working width and a choice of the class leading Honda GX390 engine and Yanmar L100 diesel engine ensuring it will tackle the toughest jobs.

The C13 is also the most versatile machine in the range, not only a rotavator, it can also operate over 25 other attachments from flail mowers to snow blowers.

## C15 Rotavator

The C15 is one of the most powerful walk behind rotavators available today. It features a choice of a powerful Honda GX390 petrol or a Kohler KD440 diesel engine and a huge reinforced 85cm rotavator box.

This is the ideal machine for landscape contractors, nurseries and other professional users and will tackle any rotavating task that can be thrown at it.

Easily adjustable handlebar height

Heavy-duty individually replaceable tines

Rotating handlebars for other implements\*

CAMON Rotavators are capable of digging the toughest ground conditions. By controlling the tine speed it is possible to use a slow speed for digging hard ground and a fast tine speed for producing a perfect fine tilth.

## Features

- > PowerSafe® clutch with 5-year warranty
- > Tough engine protection
- > All gear drive - no belts and chains - for superior levels of reliability and durability
- > Anti-vibration handlebars
- > Handlebars can be easily offset to avoid walking on cultivated ground and height adjusted for operator comfort and safety
- > Simple digging depth adjustment
- > Hard wearing tines which are very easy to replace
- > Parking brake as standard
- > The power units can operate a range of other implements including mowing and snow clearing attachments\*

\*Not C15 Rotavator

# Attachments

CAMON Rotavators can operate a wide range of attachments allowing a multitude of tasks to be undertaken. These truly versatile machines can be used all-year round to do jobs including ploughing, cutting the tallest vegetation, chipping branches, clearing snow and much more!

## Power Harrow

The Power Harrow attachment is the perfect tool for levelling an area prior to laying turf or seeding. The vertically driven tines dig the ground whilst the rear roller compacts it leaving a fine, level tilth.

## Stone Burier

In just one pass the Stone Burier will leave a perfect tilth reading for turfing or seeding. The contra-rotating tines mill the ground and the grading rods trap stones etc allowing the soil to be thrown on top.

## Flail Mower

This extremely effective Flail Mower will cut and mulch the toughest vegetation with ease. Free swinging heavy-duty blades will cut almost anything up to 1" thick whilst also offering protection from rocks, tree stumps and other objects.

## Power Brush / Snow Brush

The versatile Brush attachment can be used for sweeping yards, clearing block paving of moss, or for clearing snow up to 10cm deep. The brush can be angled left, right or straight ahead and is easily adjustable for light or heavy-duty applications.

# C2000 Tiller

Manufactured by Tracmaster the CAMON C2000 Tiller has been designed and built to withstand heavy use.

The front transport wheel makes it easy to move around site, and it is capable of producing excellent results on, for example, garden borders, allotments and vegetable plots.

The C2000 is built to last and to back that up it now has a market leading 5 year warranty.

## Heavy-duty individually replaceable tines

## Durable bolt up chain case

## Specification

	C2000
Engine	Honda GX160 petrol 4.8hp
Working Width	640mm (25")
Working Depth	200mm (8")
Speeds	1 forward
Weight	69kg
L x W x H	140 x 70 x 84cm
Warranty	Domestic Use - 5 years
	Commercial Use - 2 years

## Features

- > High torque, heavy-duty chain case for long life
- > Simple, single lever operation
- > Built-in front lifting handle
- > Full width steel tine guards for operator protection and safety
- > Height adjustable handlebars which also fold over the machine for easy transportation
- > Easy to replace heavy-duty tines

# Lawn Scarifiers

CAMON Lawn Scarifiers will efficiently rid your lawn of unwanted moss and thatch. Easy to use and very effective, the range comprises four machines. The LS42 cartridges can also be purchased separately and can be interchanged between all the units, offering a truly flexible and versatile scarifier.

## LS42 Lawn Scarifier

The CAMON LS42 range comprises a Lawn Scarifier, Lawn Rake, and Lawn Slitter each offering outstanding results in different applications. The three cartridges are completely interchangeable so you can add a different one to your machine at a later date.

A centrifugal clutch guarantees that the machine will not operate when the engine is idling ensuring the machine is only operating when you want it to.

A floating front axle helps the LS42 to follow the contours of the lawn and a lockable fine height adjustment alters the working height allowing for precise control. Other features include puncture-proof tyres, a large 45L collection bag, and folding handlebars.

## LS14 Lawn Scarifier

The LS14 is one of the first scarifiers to be fitted with Honda's new GP160 engine which is a great fit for this machine. Honda produce extremely high quality engines and the new GP range is no exception.

We have taken everything we have learned from selling the LS42 Lawn Scarifier over the past 15 years and refined it to ensure that the LS14 meets our goal of being a lightweight, narrow, and user friendly scarifier that pulls out all the thatch from your lawn that you would expect.

Features include folding handlebars, lockable fine height adjustment and an optional collection bag. If you are the owner of a large lawn or are a landscaper then this machine is certainly worth looking at.

## Specifications

	LS14	LS42	LS42F	LS42R
<b>Engine</b>	Honda GP160 petrol 4.8hp	Honda GX160 petrol 4.8hp	Honda GX160 petrol 4.8hp	Honda GX160 petrol 4.8hp
<b>Working Width</b>	420mm (17")	420mm (17")	420mm (17")	420mm (17")
<b>Cartridge</b>	Fixed blades (15)	Free swinging blades (30)	Fixed blades (15)	Spring rake (30)
<b>Collection Bag</b>	Optional	Yes	Yes	Yes
<b>Weight</b>	40kg	63kg	63kg	63kg
<b>L x W x H</b>	95 x 60 x 102cm	120 x 67 x 98cm	120 x 67 x 98cm	120 x 67 x 98cm
<b>Warranty</b>	Domestic Use - 5 years			
	Commercial Use - 2 years			

The LS14 and LS42 chassis can be fitted with any of the three cartridges.

---

### Lawn Scarifier Cartridge

---

This is our most popular all round cartridge, and is fitted with 30 independently sprung free-swinging blades. The fine blade spacing and the staggered layout ensure that it will remove more thatch than other comparable scarifiers. The blades are of a 'waisted' design so they keep their edge for longer and continue to provide fantastic performance.

The cartridge can be reversed to double the lifetime of the blades.

---

### Lawn Slitter Cartridge

---

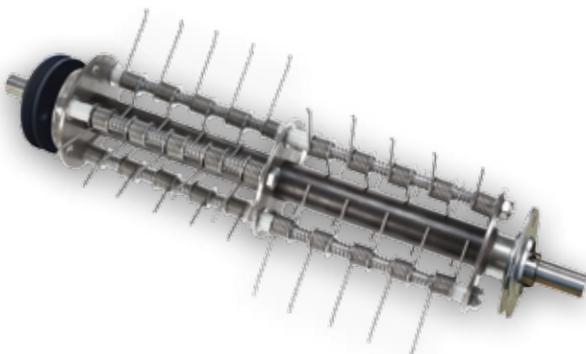

This is the most aggressive cartridge and is fitted with 15 heavy-duty fixed blades. Each blade is 2mm thick which allows for deeper scarification.

This is ideal for improving drainage or if you need to overseed.

---

### Lawn Rake Cartridge

---

The CAMON LS42R Lawn Rake is the least aggressive cartridge and offers the ability for all year round scarification.

Fitted with 30 durable free-swinging springs, the lawn rake will effortlessly clean lawns of unwanted moss and thatch without aggressively disrupting the soil or healthy growing grass.

# LA25 Lawn Aerator

Manufactured by Tracmaster, the LA25 Lawn Aerator has been designed to be strong and simple to use.

The "off-set" crank system allows the power of the engine to punch the tines into the ground. Unlike other aerators weights are not required to be taken on and off depending on ground conditions.

Supplied with both hollow corer tines and solid spikes as standard, it takes less than 5 minutes to swap between them. Hollow coring in particular is an essential part of keeping a lawn healthy in the long term as it allows oxygen, fertiliser and water to reach the grass roots.

Foam-filled tyres help to minimise tread marks and allow for fantastic manoeuvrability, and at only 64cm (25") wide the LA25 will easily fit through standard garden gates.

## Easy access for changing tines

## Specification

	LA25
Engine	Honda GX160 petrol 4.8hp
Working Width	380mm (15")
Aeration Depth	75mm (3")
Spike Details	10mm (1/3") - outer diameter
Corer Details	19mm (3/4") - outer diameter
	15mm (1/2") - inner diameter
Weight	100kg
L x W x H	100 x 64 x 68cm
Warranty	Domestic Use - 5 years
	Commercial Use - 2 years

## Features

- > Corers and spikes supplied as standard, less than 5 minutes to change
- > Only 64cm (25") wide for easy access
- > Straightforward operation
- > Folding handlebars for easy transportation and storage
- > Foam-filled tyres minimise tread marks
- > Reliable and powerful Honda petrol engine

# TC07 Turf Cutter

The self-propelled TC07 Turf Cutter features a gearbox and chain drive, which provides an extremely positive drive to the rear wheels. This ensures that even in difficult ground conditions the CAMON TC07 Turf Cutter will keep driving forward.

The TC07 has fine depth adjustment between 10mm to 35mm. The hardened steel cutting blade can be reversed, providing double the life.

A choice of wheels is available for the Turf Cutter, either puncture-proof tyres with a small tread, or agricultural tyres with a deeper tread.

The TC07 Turf Cutter is fitted with a heavy duty centrifugal clutch which ensures that it will not operate when the engine is idling.

Vibration is kept to a minimum thanks to the extremely effective four point anti-vibration handlebars.

**Positive gear drive**

**Choice of wheels**

## Specification

	TC07
<b>Engine</b>	Honda GX160 petrol 4.8hp
<b>Working Width</b>	300mm (12")
<b>Cutting Depth</b>	10mm to 35mm (1/2" to 1 1/2")
<b>Drive</b>	Positive gear drive
<b>Weight</b>	93kg
<b>L x W x H</b>	170 x 67 x 97cm
<b>Warranty</b>	Domestic Use - 5 years
	Commercial Use - 2 years

## Features

- > Heavy-duty gearbox
- > Easy depth adjustment
- > Folding handlebars for easy transportation and storage
- > Reversible cutting blade for double the life
- > Choice of agricultural tyres or puncture-proof tyres
- > Reliable and powerful Honda petrol engine

# Chippers & Shredders

Whether you are clearing your garden or are a professional landscaper looking to recycle large volumes of green waste, our CAMON Chippers and Shredders are ideally suited to help you accomplish your task. They are reliable, simple to operate and extremely effective.

## C50i Garden Chipper

The CAMON C50i Garden Chipper is a solid effective machine for disposing of garden waste including branches, brushwood and prunings.

This superb machine is very simple to operate, simply drop the vegetation to be chipped into the chute of this gravity-fed machine. The vegetation will be chopped by the chipping blade and fired out of the discharge chute onto the ground or into the optional collecting bag.

The C50i has convenient handles on the top of the feed chute and large wheels to ensure that it is easy to move around the garden.

The feed chute can be disconnected in seconds, making the C50i extremely easy to transport, and there is also an optional easy-to-remove bag available to collect the chippings.

## C80 Chipper Shredder

The CAMON C80 Chipper Shredder features both a chipping chute and a chute for shredding.

The power of the engine and the chipping/shredding knives will do all the hard work - the chipping chute will reduce branches and saplings up to 2" thick to chippings in seconds, while the independent shredding chute will turn green vegetation, hedge clippings etc, into compostable mulch quickly, effectively and without blocking.

The C80 has an adjustable discharge grille to help grade the material as it comes out. This is controlled via a lever on the side and can be opened if you are shredding particularly wet material.

For easy storage and manoeuvrability the side chute can be locked in an upright position.

**C50i with reliable Honda GX160 engine**

**C80 discharge grille with safety cover**

**C150 with chipping chute hinged**

C50i optional collection bag

C80 shredding blades

C150 discharge grille adjusting handle

## C150 Chipper Shredder

The CAMON C150 Chipper Shredder is similar in design to the C80, featuring both a shredding chute and a chipping chute. However it has the added power of the larger Honda GX390 engine and larger chutes meaning it will process the wood up to twice as fast.

In addition to all the features of the C80, the C150 has wheelbarrow style handlebars ensuring that, for a large machine, it is easy to transport around the garden or in and out of trailers.

## Specifications

	C50i	C80	C150
<b>Engine</b>	Honda GP200 petrol 5.5hp	Honda GX270 petrol 8.4hp	Honda GX390 petrol 11.7hp

	Commercial Use - 2 years		

\*with chute in hinged position

# SG30 Stump Grinder

The CAMON SG30 Stump Grinder is designed and manufactured by us here in West Sussex to meet the needs of a variety of users from DIY hirers to professional contractors.

We have taken our 15 years' experience of supplying stump grinders to develop a machine that will provide fantastic performance with low running costs coupled with superior parts and top-of-the-range build quality.

## Features

### Fantastic performance

- > The SG30 is fitted with efficient and hardwearing Greenteeth®.
- > Power is provided by the Honda GX390 banks engine.
- > Red Power belts are used which transmit more power.
- > Superior heavy duty wheel brake.
- > Folding handlebars for transportation and storage.
- > The machine is only 63cm wide to fit through garden gates etc.

### Low running costs

- > The Greenteeth® are cheaper than standard teeth and quicker to replace.
- > Each tooth has 3 working edges providing 3 times the lifespan.
- > Top of the range belts need minimal adjustment and are very durable.

### Strength and reliability

- > The chassis is reinforced for additional strength.
- > The SG30 has a top of the range centrifugal clutch.
- > Efficient Greenteeth® mean less strain on the machine.
- > Very strong robust handlebar structure.
- > Simple operating controls ensure straightforward operation.

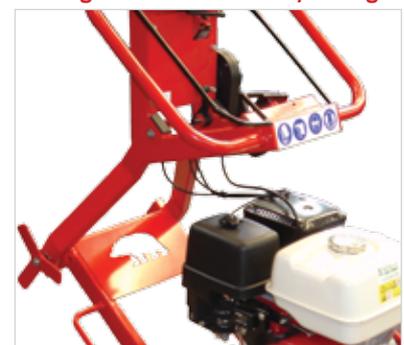

## Specification

	SG30
Engine	Honda GX390 Banks petrol 11.7hp
Cutting Height	560mm (22") above ground
Cutting Depth	330mm (13") below ground
Teeth	8 Greenteeth®
Weight	135kg
L x W x H	190 x 63 x 126cm
Warranty	Domestic Use - 3 years
	Commercial Use - 2 years

### Hardwearing Greenteeth®

### Folding handlebars for easy storage

# Brushcutters

CAMON brushcutters feature anti-vibration and adjustable handlebars for perfect weight distribution, Honda engines, bump feed head and grass blade as standard. We can also supply alternative cutting heads from clearing saws to the fantastic Nylsaw Speed heads.

## H025 Brushcutter

The H025 features the super-efficient and quiet 4-stroke Honda GX25 engine.

This brushcutter is lightweight, yet robust and powerful enough to tackle heavy undergrowth.

The H025 has a D Loop style handle and shoulder harness.

## H035 Brushcutter

The H035 features the powerful 4-stroke Honda GX35 engine. The adjustable bike style handlebars and comfortable shoulder harness give greater control and allow the operator to work for longer without fatigue.

Landscapers and domestic customers alike will find this a brushcutter that will give years of fantastic performance.

## Combi H035 Brushcutter

The Combi H035 Brushcutter is a lightweight multi-function in tool powered by a reliable 4-stroke Honda engine. The easy start Honda engine can be filled with standard unleaded fuel, removing the need for mixing specialist 2-stroke fuel.

The brushcutter is fitted with a bump feed head as standard but it can be fitted with a variety of different or more specialised heads. The double headed hedgetrimmer can be angled to ensure maximum cutting efficiency on every type and size of hedge.

The pole saw allows you to safely cut tall branches with the minimum of effort. A 75cm extension is included to help access those hard to reach places.

## Specifications

	H025	H035	Combi H035
Power	25cc Honda GX25 4-stroke petrol	35.8cc Honda GX35 4-stroke petrol	35.8cc Honda GX35 4-stroke petrol
Shaft Diameter	24mm	27mm	24mm
Handle	D-Loop	Bike-Type	D-Loop
Attachments	-	-	Brushcutter Hedgetrimmer Chain Pruner 75cm Extension
Weight	5.3kg	7.7kg	4.47kg
Warranty	Domestic Use - 1 year		
	Commercial Use - 1 year		

# Lawnmowers

CAMON Lawnmowers are ideally suited to both homeowners and professional users and include features such as steel decks, either push or self-propelled drive, simple height adjustment, bearings in the wheels, grass collection bags and foldable handlebars.

## Taurus 41 Lawnmower

The Taurus 41 is a 16" (41cm) push steel deck mower powered by an easy to start and economical 148cc Briggs & Stratton engine.

The cutting height can be adjusted through 6 positions from 25mm to 75mm by a single lever. This is an easy to push mower fitted with a 45L collector bag and is ideally suited for small to medium sized gardens.

## Taurus 46TH Lawnmower

The Taurus 46TH is an 18" (46cm) self-propelled steel deck mower powered by the superb Honda GCV135 engine.

The cutting height is adjustable via a single lever through 5 positions from 30mm to 75mm and with its 3.6km/h mowing speed and 60L collection bag the 46TH is perfect for small to medium sized gardens.

## Taurus 51TH Lawnmower

The Taurus 51TH is a 20" (51cm) self-propelled steel deck rotary mower powered by the powerful and easy to start Honda GCV160 engine.

The cutting height is adjustable from 30mm to 75mm, through 5 positions by a single lever and the machine has a mowing speed of 3.6km/h.

This 3-in-1 mower can either collect the grass with the 65L bag, discharge overgrown grass through its side, or mulch the grass with the supplied mulch plug. It is the ideal mower for medium to large lawns.

## Specifications

	Taurus 41	Taurus 46TH	Taurus 51TH
Engine	148cc Briggs & Stratton 450 petrol	135cc Honda GCV135 petrol	160cc Honda GCV160 petrol
Cutting Width	410mm (16")	460mm (18")	510mm (20")

Warranty	Domestic Use - 1 year		
	Commercial Use - 1 year		

### WHY MULCH?

It is typically up to a third faster to cut the lawn. The mulched grass will also act as a natural fertiliser as it is cut up into much smaller pieces which will break down faster than normal cut grass.

# Hole Borers

CAMON Hole Borers are ideal for quickly and efficiently creating holes for post driving, fencing or tree planting even on sloping ground and with the option of a one-man or a two-man hole borer, there is a machine for all tasks.

## NEAHO35 Hole Borer

The NEAHO35 is a one-man hole borer designed to be simple to use but robust enough for commercial use.

The NEAHO35 is powered by the easy-to-start and market leading Honda GX35 engine and features both a reduction gearbox and a clutch system. This not only provides good torque but also ensures that the unit will only drive the auger when you want it to.

## T160HO Hole Borer

The T160HO is a two-man hole borer featuring the 4-stroke Honda GCV160 engine. The T160HO has a number of important features that ensure it is an ideal machine for contractors.

The T160HO has a reduction gearbox for increased torque, it also has a clutch system so that if the auger catches the clutch will slip.

Most importantly, for a larger machine, the auger can be reversed which makes it far simpler to remove the unit if it gets caught under a tree root, for example.

## Specifications

	NEAHO35	T160HO
<b>Power</b>	35cc Honda GX35 petrol	160cc Honda GCV160 petrol

# Blower/Vacuum

Eliminate the need for rakes, brooms, shovels, and gathering with your hands with the new CAMON EBV260BN Blower/Vacuum.

This machine blows and sucks anything that enters its suction hose including waste, small branches, leaves, grass, paper, pine cones, and more for elimination in the 45 litre collection bag.

It has a mulching ratio of 10:1 so it is also a great way of getting the compost started.

## Specification

	EBV260BN
Engine	25.4cc 2-stroke petrol
Mulching Ratio	10:1
Collection Bag	45L
Weight	5.7kg as vacuum / 4.6kg as blower
Warranty	Domestic Use - 1 year
	Commercial Use - 1 year
