

FEATURES & BENEFITS

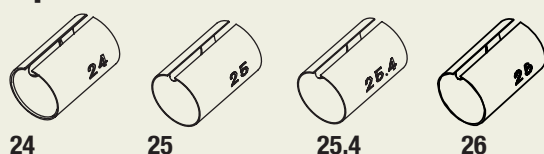

DEPEND ON IT

Newly developed gear case fits on trimmers and brushcutters with an outer pipe of $\phi 28\text{mm}$. Suitable for large engine displacement brushcutters up to 40ml class due to increased gear reduction ratio from 1:2.7 to 1:4.

Optional wide blade(P/N: SK2118VWY) gives greater efficiency, especially with large engine displacement brushcutters.

PRS-231M can also be used on small trimmers and brushcutters in the same way as the PRS-230M by changing the pipe sleeve and gear case adapter.
