## About Tracmaster

**Established in 1984, Tracmaster specialises in the manufacture of the CAMON landscape machinery and the ARTIO range of two wheel tractor implements and accessories. We are also the UK distributor for the world-class BCS two wheel tractors, power scythes and professional mowers.**

We are committed to maintaining top quality products and service to our customers.

Our expertise is second-to-none and our continuous investment in research and development ensures that our products are constantly cutting edge.

Professional landscapers, contractors, conservation groups, local authorities, hire outlets, and domestic users across the UK and Ireland all choose CAMON over and above alternative products.

We are very proud that our CAMON equipment is the first choice for so many customers across the UK and now into Europe where our distribution network is expanding.

The quality of the CAMON range speaks for itself. Machines that are built to last and produce outstanding results, and at competitive prices.

The range includes ground cultivation equipment, chipper, stump grinder, lawn scarifiers and aerators, turf cutter, and more.

Since 1984, Tracmaster has also been the sole UK distributor for the BCS ranges of Two Wheel Tractors, Power Scythes and Professional Mowers, ensuring that these machines have also become market leaders with a reputation as the best in their field.

In 2018 Tracmaster launched the ARTIO range of Two Wheel Tractor Implements and Accessories.

Having continued to evolve and expand our product range, most recently with the introduction of our BC65 Lawn Scarifier attachment, we are now exporting ARTIO units to BCS Distributors around the globe.

The ARTIO range also includes a buck rake and a wheel barrow, as well as adjustable wheel spacers and counterbalance weight kits, all designed for use with most popular makes of two wheel tractor.

# Rotavators

BCS Rotavators feature the PowerSafe® Clutch. This patented hydraulic system provides instant control over the machine and implement ensuring maximum safety at all times, and is supported by a 5-year warranty.

## BCS 710 Rotavator (CAMON C8)

The 710 Rotavator is our best-selling rotavator and has over the years become the first choice for hire companies and landscapers throughout the UK. Key to its success is the combination of the powerful Honda GX270 engine and its compact size.

Ideal for hire companies, allotment owners, gardeners and landscapers, the 710 will provide a great finish even in previously uncultivated ground.

## BCS 738 Rotavator (CAMON C10)

The 738 Rotavator features a locking differential and large wheels providing easier manoeuvring and also giving you increased traction when you need it.

If you are looking for a compact rotavator with a large working width and plenty of power then the 738 is the ideal choice.

## BCS 740 Rotavator (CAMON C13)

The 740 is our most popular large rotavator. As well as a locking differential it also has the added benefit of steering brakes, making it simple to manoeuvre.

It features a large 66cm working width and a choice of the class leading Honda GX390 engine and Yanmar L100 diesel engine ensuring it will tackle the toughest jobs.

The 740 is also the most versatile machine in the range, not only a rotavator, it can also operate over 25 other attachments from flail mowers to snow blowers.

## BCS 750 Rotavator (CAMON C15)

The 750 is one of the most powerful walk behind rotavators available today. It features a choice of a powerful Honda GX390 petrol or a Kohler KD440 diesel engine and a huge reinforced 85cm rotavator box.

This is the ideal machine for landscape contractors, nurseries and other professional users and will tackle any rotavating task that can be thrown at it.

**Easily adjustable handlebar height**

**Heavy-duty individually replaceable tines**

**Rotating handlebars for other implements**

BCS Rotavators are capable of digging the toughest ground conditions. By controlling the tine speed it is possible to use a slow speed for digging hard ground and a fast tine speed for producing a perfect fine tilth.

## Features

- > PowerSafe® clutch with 5-year warranty.
- > Tough engine protection.
- > All gear drive - no belts and chains - for superior levels of reliability and durability.
- > Anti-vibration handlebars.
- > Handlebars can be easily offset to avoid walking on cultivated ground and height adjusted for operator comfort and safety.
- > Simple digging depth adjustment.
- > Hard wearing tines which are very easy to replace.
- > Parking brake as standard.
- > The power units can operate a range of other implements including mowing and snow clearing attachments.

# Attachments

BCS Rotavators can operate a wide range of attachments allowing a multitude of tasks to be undertaken. These truly versatile machines can be used all-year round to do jobs including ploughing, cutting the tallest vegetation, chipping branches, clearing snow and much more!

## BC65 Lawn Scarifier

With a working width of 65cm (25"), the ARTIO BC65 Lawn Scarifier is equipped with 48 free-swinging blades.

The blades are a "waisted" shape for unbeatable performance and long life. They are all offset from each other to provide maximum coverage with each pass, they are also reversible to provide double the working life. A full-width front roller provides even scarifying and adjusts the blade depth, and a swivel joint near the PTO connection allows the lawn scarifier to follow the contours of the ground.

Other blade assemblies available include a fixed blade for deeper scarification, and a spring rake for lighter scarifying. The unique rotor design enables the blade assemblies to be changed in minutes.

## Flail Mower

This extremely effective Flail Mower will cut and mulch the toughest vegetation with ease.

Free swinging heavy-duty Y-shaped blades cut almost anything up to 1" thick and provide the best all-round cut, from short grass to overgrown brambles. They also offer protection from rocks, tree stumps and other objects.

The cutting height can be adjusted from 1cm to 6cm for different ground conditions and heights of vegetation.

The Flail Mower has a full-width steel rear roller to help prevent unnecessary scalping of the ground, and can also be fitted with front castor wheels as an optional extra.

## Scythe Cutter Bar

From taming dense vegetation to creating beautiful wildflower meadows to attract wildlife, the Scythe Cutter Bar is a unique tool for managing all types of environments successfully.

Typical applications for the Scythe Cutter Bar include cutting long grass, brambles, bracken, gorse, wildflowers, reeds, thistles, nettles, weeds and saplings in areas including meadows, woodlands, reedbeds, orchards, paddocks, pathways, conservation sites and many other locations.

Many times quicker and more productive than a traditional strimmer, the Scythe Cutter Bar operates with the engine just above tickover so it's quiet and economic, running all day on just one tankful of fuel.

### Stone Burier

In just one pass the Stone Burier will leave a perfect tilth ready for turfing or seeding.

The horizontal contra-rotating tines mill the ground whilst the grading rods trap stones and debris allowing the soil to be thrown on top.

The digging depth can be easily adjusted from 2cm to 12cm by simply turning the lever located on top of the stone burier. There is a choice of rear roller - a mesh roller which is best suited to dry conditions, or a cage roller for use in wet conditions.

This is a fantastic landscaping tool, ideal for helping to prepare new-build sites in particular.

### Power Harrow

The Power Harrow attachment is the perfect tool for levelling an area prior to laying turf or seeding.

The vertically driven tines dig the ground from 2cm to 13cm (16cm on the larger model) whilst the rear roller compacts it leaving a fine, level tilth. This avoids bringing roots to the surface or the soil and helps prevent destruction of the soil structure.

An optional levelling bar is also available.

As well as a fantastic landscaping tool, the Power Harrow is perfect for market gardeners for preparing raised beds and ground prior to planting.

### Power Brush / Snow Brush

The versatile Brush attachment can be used for many different sweeping applications including leaves, moss, mud and more.

It also excels as a snow brush, easily clearing snow up to 10cm deep to leave a clear, safe surface.

The brush can be angled left or right to windrow material, or straight ahead to move it into piles.

Quick height adjustment allows for more or less aggressive sweeping, making it the ideal tool for many different surfaces.

The brush is fitted with heavy-duty nylon bristles which are very hard wearing. It is made up of sections of wavy and straight brushes so that the sections can be replaced individually.

**This is just a small selection of the implements available for the BCS Rotavators.  
For more details on the complete range please visit our website or contact us.**

# C2000 Tiller

Manufactured by Tracmaster the CAMON C2000 Tiller has been designed and built to withstand heavy use.

The front transport wheel makes it easy to move around site, and it is capable of producing excellent results on, for example, garden borders, allotments and vegetable plots.

The C2000 is built to last and to back that up it now has a market leading 3-year warranty.

## Heavy-duty individually replaceable tines

## Durable bolt up chain case

## Specification

	C2000
Engine	Honda GX160 petrol 4.8hp
Working Width	640mm (25")
Working Depth	200mm (8")
Speeds	1 forward
Weight	75kg
L x W x H	140 x 70 x 84cm
Warranty	Domestic Use - 3 years
	Commercial Use - 2 years

## Features

- > High torque, heavy-duty chain case for long life.
- > Simple, single lever operation.
- > Built-in front lifting handle.
- > Full width steel tine guards for operator protection and safety.
- > Height adjustable handlebars which also fold over the machine for easy transportation.
- > Easy to replace heavy-duty tines.

# TC07 Turf Cutter

The self-propelled TC07 Turf Cutter features a gearbox and chain drive, which provides an extremely positive drive to the rear wheels. This ensures that even in difficult ground conditions the CAMON TC07 Turf Cutter will keep driving forward.

The TC07 has fine depth adjustment between 10mm to 35mm. The hardened steel cutting blade can be reversed, providing double the life.

A choice of wheels is available for the Turf Cutter, either puncture-proof tyres with a small tread, or agricultural tyres with a deeper tread.

The TC07 Turf Cutter is fitted with a heavy duty centrifugal clutch which ensures that it will not operate when the engine is idling.

Vibration is kept to a minimum thanks to the extremely effective four point anti-vibration handlebars.

Positive gear drive

Choice of wheels

## Specification

	TC07
Engine	Honda GX160 petrol 4.8hp
Working Width	300mm (12")
Cutting Depth	10mm to 35mm (½" to 1½")
Drive	Positive gear drive
Weight	93kg
L x W x H	170 x 67 x 97cm
Warranty	Domestic Use - 3 years
	Commercial Use - 2 years

## Features

- > Heavy-duty gearbox.
- > Easy depth adjustment.
- > Folding handlebars for easy transportation and storage.
- > Reversible cutting blade for double the life.
- > Choice of agricultural tyres or puncture-proof tyres.
- > Reliable and powerful Honda petrol engine.

# Lawn Scarifiers

CAMON Lawn Scarifiers will efficiently rid your lawn of unwanted moss and thatch. Easy to use and very effective, the range comprises four machines. The Scarifier cartridges can also be purchased separately and can be interchanged between both the units, offering a truly flexible and versatile scarifier.

## LS42 Lawn Scarifier

The CAMON LS42 range comprises a Lawn Scarifier, Lawn Rake, and Lawn Slitter each offering outstanding results in different applications. The three cartridges are completely interchangeable so you can add a different one to your machine at a later date.

A centrifugal clutch guarantees that the machine will not operate when the engine is idling ensuring the machine is only operating when you want it to.

A floating front axle helps the LS42 to follow the contours of the lawn and a lockable fine height adjustment alters the working height allowing for precise control. Other features include puncture-proof tyres, folding handlebars, and an optional 45L collection bag.

## LS14 Lawn Scarifier

The LS14 is one of the first scarifiers to be fitted with Honda's new GP160 engine which is a great fit for this machine. Honda produce extremely high quality engines and their GP range is no exception.

We have taken everything we have learned from selling the LS42 Lawn Scarifier over the past 17 years and refined it to ensure that the LS14 meets our goal of being a lightweight, narrow, and user friendly scarifier that pulls out all the thatch from your lawn that you would expect.

Features include folding handlebars, lockable fine height adjustment and an optional collection bag. If you are the owner of a large lawn or are a landscaper then this machine is certainly worth looking at.

## Specifications

	LS14	LS42
Engine	Honda GP160 petrol 4.8hp	Honda GX160 petrol 4.8hp
Working Width	420mm (17")	420mm (17")
Cartridge Options	Free swinging blades (30 blades)	Free swinging blades (30 blades)
	Fixed blades (15 springs)	Spring rake (30 springs)
		Fixed blades (15 blades)
		Renovation blades (15 blades)
Collection Bag	Optional 35L	Optional 45L
Weight	40kg	63kg
L x W x H	95 x 60 x 102cm	120 x 67 x 98cm
Warranty	Domestic Use - 3 years	
	Commercial Use - 2 years	

---

## Free-Swinging Blade Cartridge

---

This is our most popular all round cartridge, and is fitted with 30 independently sprung free-swinging blades. The fine blade spacing and the staggered layout ensure that it will remove more thatch than other comparable scarifiers. The blades are of a 'waisted' design so they keep their edge for longer and continue to provide fantastic performance.

The cartridge can be reversed to double the lifetime of the blades.

Suitable for the LS42 and LS14.

---

## Spring Rake Cartridge

---

The Spring Rake is the least aggressive cartridge and offers the ability for all year round scarification.

Fitted with 30 durable free-swinging springs, the lawn rake will effortlessly clean lawns of unwanted moss and thatch without aggressively disrupting the soil or healthy growing grass.

Suitable for the LS42.

---

## Fixed Blade Cartridge

---

The Fixed Blade Cartridge is the most aggressive scarifier cartridge. It is fitted with 15 heavy-duty fixed blades, each of which is 2mm thick to allow for deeper scarification.

This is ideal for slitting lawns to improve drainage, or for overseeding or top dressing.

Suitable for the LS42 and LS14.

---

## Renovation Cartridge

---

The Renovation Cartridge is fitted with 15 fixed blades, each of which is 2mm thick. This cartridge is designed to be used in situations where the old lawn needs to be completely renewed.

Each blade has three tips - one straight, one angled to the left, and one to the right to help provide maximum coverage. These angled blades also help to rip out the old grass.

Suitable for the LS42 and LS14.

# LA25 Lawn Aerator

Designed and built by Tracmaster, the LA25 Lawn Aerator has been designed to be strong and simple to use.

The “off-set” crank system allows the power of the engine to punch the tines into the ground. Unlike other aerators weights are not required to be taken on and off depending on ground conditions.

Supplied with both hollow corer tines and solid spikes as standard, it takes less than 5 minutes to swap between them. Hollow coring in particular is an essential part of keeping a lawn healthy in the long term as it allows oxygen, fertiliser and water to reach the grass roots.

Foam-filled tyres help to minimise tread marks and allow for fantastic manoeuvrability, and at only 64cm (25") wide the LA25 will easily fit through standard garden gates.

## Easy access for changing tines

## Specification

	LA25
Engine	Honda GX160 petrol 4.8hp
Working Width	400mm (16")
Aeration Depth	75mm (3")
Spike Details	10mm (1/3") - outer diameter
Corer Details	19mm (3/4") - outer diameter
	15mm (1/2") - inner diameter
Weight	103kg
L x W x H	100 x 64 x 68cm
Warranty	Domestic Use - 3 years
	Commercial Use - 2 years

## Features

- > Corers and spikes supplied as standard, less than 5 minutes to change.
- > Only 64cm (25") wide for easy access.
- > Straightforward operation.
- > Folding handlebars for easy transportation and storage.
- > Foam-filled tyres minimise tread marks.
- > Reliable and powerful Honda petrol engine.

# SG30 Stump Grinder

The CAMON SG30 Stump Grinder is designed and manufactured by us here in West Sussex to meet the needs of a variety of users from DIY hirers to professional contractors.

We have taken our 17 years' experience of supplying stump grinders to develop a machine that will provide fantastic performance with low running costs coupled with superior parts and top-of-the-range build quality.

## Features

### Fantastic performance

- > The SG30 is fitted with efficient and hardwearing Greenteeth®.
- > Power is provided by the Honda GX390 banks engine.
- > Red Power belts are used which transmit more power.
- > Superior heavy duty wheel brake.
- > Folding handlebars for transportation and storage.
- > The machine is only 63cm wide to fit through garden gates etc.

### Low running costs

- > The Greenteeth® are quicker to replace than standard teeth.
- > Each tooth has 3 working edges providing 3 times the lifespan.
- > Top of the range belts need minimal adjustment and are very durable.

### Strength and reliability

- > The chassis is reinforced for additional strength.
- > The SG30 has a top of the range centrifugal clutch.
- > Efficient Greenteeth® mean less strain on the machine.
- > Very strong robust handlebar structure.
- > Simple operating controls ensure straightforward operation.

## Specification

	SG30
Engine	Honda GX390 Banks petrol 11.7hp
Cutting Height	560mm (22") above ground
Cutting Depth	330mm (13") below ground
Teeth	8 Greenteeth®
Weight	135kg
L x W x H	190 x 63 x 126cm
Warranty	Domestic Use - 3 years
	Commercial Use - 2 years

### Hardwearing Greenteeth®

### Folding handlebars for easy storage

# Chippers & Shredders

Whether you are clearing your garden or are a professional landscaper looking to recycle large volumes of green waste, our Chippers and Shredders are ideally suited to help you accomplish your task. They are reliable, simple to operate and extremely effective.

## C50i Garden Chipper

The CAMON C50i Garden Chipper is a solid effective machine for disposing of garden waste including branches, brushwood and prunings.

This superb machine is very simple to operate, simply drop the vegetation to be chipped into the chute of this gravity-fed machine. The vegetation will be chopped by the chipping blade and fired out of the discharge chute onto the ground or into the optional collecting bag.

The C50i has convenient handles on the top of the feed chute and large wheels to ensure that it is easy to move around the garden.

The feed chute can be disconnected in seconds, making the C50i extremely easy to transport, and there is also an optional easy-to-remove bag available to collect the chippings.

C50i with reliable Honda GX200 engine

## BIO 80 Chipper Shredder

The BIO 80 Chipper Shredder features both a chipping chute and a chute for shredding.

The power of the engine and the chipping/shredding knives will do all the hard work - the chipping chute will reduce branches and saplings up to 2" thick to chippings in seconds, while the independent shredding chute will turn green vegetation, hedge clippings etc, into compostable mulch quickly, effectively and without blocking.

The BIO 80 has an adjustable discharge grille to help grade the material as it comes out. This is controlled via a lever on the side and can be opened if you are shredding particularly wet material.

For easy storage and manoeuvrability the side chute can be locked in an upright position.

BIO 80 discharge grille with safety cover

BIO 150 with chipping chute hinged

C50i optional collection bag

BIO 80 shredding blades

BIO 150 discharge grille adjusting handle

### BIO 150 Chipper Shredder

The BIO 150 Chipper Shredder is similar in design to the BIO 80, featuring both a shredding chute and a chipping chute.

However it has the added power of the larger Honda GX390 engine and increased capacity chutes so it will process the wood up to twice as fast.

The BIO 150 has wheelbarrow style handlebars ensuring that, for a larger machine, it is easy to transport around the garden or in and out of trailers.

## Specifications

	C50i	BIO 80	BIO 150
Engine	Honda GX200 petrol 5.5hp	Honda GX270 petrol 8.4hp	Honda GX390 petrol 11.7hp
Chipping Capacity	50mm (2")	50mm (2")	76mm (3")
